Assignment 5 CRUD AGAIN

PROBLEM:

We have covered Create, Read and discussed Update and Delete. Now its time to put all that to use.

Do the following:

- Write a function to check if the user already exists in the database FirstName, LastName, Email, DOB are the data to double check.

- Write a function to delete a particular selected user

- Write a function to update a selected user active status flag to 0 (deactivate a user)

- Write a function to delete a particular user.

The usual, get screen shots of output and codes, zip your code files and the screenshots. Also make PDF if you can and submit.
